

Simpatico Systems and SentinelOne Autonomous AI Platform

One platform to prevent, detect, respond, and hunt in the context of all enterprise assets. See what has never been seen before. Control the unknown. All at machine speed.

The Tomorrow's Threats Require a New Enterprise Security Paradigm

Key Benefits

Real-Time Endpoint Protection

Multiple patented AI algorithms protect against the widest array of threat vectors. Eliminate dependency on connectivity, cloud latency, and human intervention. On-device AI prevents known and unknown threats in real time.

Active Detection & Response

Devices self defend and heal themselves by stopping processes, quarantining, remediating, and even rolling back events to surgically keep endpoints in a perpetually clean state. Hunt more and pivot less.

On-Demand Security Operations

Threats and attackers target SMBs the same as big enterprise firms, leveraging the same tactics. We provide a security operations center (SOC) that scales protection with your business, providing the staff necessary to drive threat remediation.

Ransomware Peace of Mind

A \$1m warranty is included to cover costs for ransomware in the unlikely event it is unable to protect or remediate. While it is not likely ransomware will ever impact you when using SentinelOne, it's nice to know you are covered.

Simpatico & SentinelOne Delivers Security and Business Wins

Complete SOC Services

Implement advanced operations without the need for in-house security expertise. The complete Fortify SOC analyzes quarantined applications and files, reducing false positives and ensuring comprehensive protection. We take care of the challenges of cybersecurity while you focus on your business.

Threat Detection

Our solution rapidly recognizes thousands of viruses and malware attack variants, including cryptomining attacks, as well as the root causes of these malicious behaviors, by quickly identifying and diagnosing corrupt source processes and system settings.

Response and Remediation

When malicious behavior is detected, Fortify for Endpoint Security will quickly rollback files to previous safe versions through tracking changes in your devices and restoring them to an acceptable risk state.

Next-Generation Endpoint Security

SentinelOne's platform uses unique malware detection and remediation technology. This solution incorporates the industry's most innovative prevention, providing visibility into the root causes and origins of the threat, reversing the malicious operations and remediating them at an agile speed as needed.

Securing the Best of the Best

At Simpatico Systems and SentinelOne, customers are #1. Global industry leaders across every vertical thoroughly test and select us as their endpoint security solution of today and tomorrow. We protect trillions of dollars of enterprise value across millions of endpoints. The SentinelOne platform safeguards the world's creativity, communications, and commerce on devices and in the cloud.
